+1 825 439 3437

Currently enrolled in Bachelors in Computing Science as a 2nd year in University of Alberta.

I want to develop my skills for software practices and work with others to effectively create and provide value to real customers.

I value listening and being able to learn from feedback's from others so that I can increase my capability to create value for others.

When being part of an internship, I personally believe that being able to listen, focus on customer experiences and the ability to priorities on the most important tasks that create value for others is the most important.

Work Experience

Crew Member

McDonald's-Edmonton, AB

November 2021 to September 2022

The most important thing I learned from my previous part time experience at McDonald is the importance of listening to the customers and being able to provide the best customer experience.

Education

Bachelor's in Computer Science

University of Alberta - Edmonton, AB

September 2023 to Present

• Current GPA: 3.4 (As of May 2023)

• Relevant Courses: Introduction to the Foundations of Computation I and II, Practical Programming methodology, Formal Systems and Logic, Algorithms I, Introduction to Applied Statistics I and II.

High school diploma or GED

Harry Ainlay Highschool - Edmonton, AB

September 2020 to June 2023

The most important lessons I learned during my high school years that allowed me to enroll into University is incremental growth in my learning and embracing mistakes to learn for improvement rather than being pessimistic about them.

Skills

• Ruby (Less than 1 year)

• Customer service (1 year)

• Git (Less than 1 year)

• GitHub (Less than 1 year)

- Python (1 year)

Languages

- Japanese - Beginner
- Korean - Intermediate

Certifications and Licenses

HCS3000 Workplace Safety System

October 2020 to Present

Certification of completing Workplace Systems Course and met the necessary outcomes as outlined by Alberta education.
